

GLOBAL SENSORS TEST STRIPS

pH Strips Never Lose Their Calibration

Anyone who has been around a lab for a period of time has had some experience with a pH meter. They are expensive and they tend to drift and lose their calibration quite quickly. For most testing in the food area, a high degree of precision is not required.

The best choice for pH measurements for acid solutions or food is the 0-6 pH range and for overall pH measurements, use the universal 0-13 pH range.

The strips come in a roll, so just tear off the size needed and use the comparison chart to read.

Global Sensors AQA 1312 pH Testing Kit
\$16.00 each.

Global Sensors AQA 1347 pH Testing Kit
\$18.00 each.

Global Sensors pH Testing Strips for Food Service

Refills are available for these pH kits. Call us for pricing and availability.

Kits come in a plastic roll case with built-in color code for reading the response of the strips.

Strips change color almost immediately. Match the color for the pH value.

AQA1312

pH 0 - 13 Test Kit Single 50' Roll

- one 50' roll,
- range 0 to 13 pH in single pH units
- w/dispenser and color match chart

AQA1347

pH 0 - 6 Test Kit Two 50' Rolls

- two 50' rolls in single protective case
- pH 0-6.0 in 0.5 pH units
- includes color match chart
