

GLOBAL SENSORS NEW ITEM

## Best in the Wet and the Heat

OK. Out there in the real world things are wet and wild. Here is an accurate and reliable thermometer that meets the challenge. You can even put it directly into a dishwasher to check temperatures there.

This economical thermistor-based digital thermometer has a cap for needle protection and has a very high accuracy. It has a hold button to "freeze" a measurement and is °F/°C switchable to fit all of your uses. Check dishwasher temperatures with it by just reading the max memory after a dishwashing cycle.

No need to worry about calibration. The AQA4500 will retain its calibration. Using unique circuit designs that store calibration settings in non-volatile memory, field adjustment has become a thing of the past. This technological innovation allows us to guarantee the accuracy.

# Global Sensors Waterproof Heat Resistant Probe

*Celsius and Fahrenheit ranges are shown on the face of the thermometer.*

*All buttons are momentary contact ... just push and release for action.*

**PRODUCT SPECIFICATIONS**

PS#34

Temperature Range	-40° to 450°F, -40° to 232°C
Operating Range	+32°F to +122°F (0 to +50°C) [unit range]
Accuracy Normal	± 1.8°F (1.0°C)
LCD Height	: 0.25" / 6.35mm
Auto Off	after 10 minutes of non use
Calibration	Accurate for Life
Features	F/C Switchable   Max/Min   Temperature Memory   Hold Mode
Alarm	Adjustable Temperature Alarm
Response Time	<6 seconds
Certifications:	NSF, CE, WEEE, RoHS
Shaft Length	4.625" / 11.75cm
Battery	1.5v #392
Weight	0.7 oz
