

GLOBAL SENSORS NEW ITEM

Easy to Read Frig/Freezer Thermometer has Digital Accuracy

Here is an excellent solution to quick and easy monitoring of a refrigerator or freezer. Set this up and you are ready for one second monitoring. Most display thermometers have numbers that are so small, you have to walk up to the instrument to see if there is an issue.

Not our big digit unit. Just set it up in a permanent location and put the cable past the gasket of the refrigerator or freezer, and you are monitoring.

It is ready for operation out of the box. NSF Certified.

Global Sensors Big Digit Refrigerator/Freezer Display Thermometer \$39.95 each.
